Year 12 student seeking cyber security work experience. Develop web applications, maintain Linux and cloud services, and explore security through a home lab and Cisco courses. Previous Tesco placements covered software development, IT operations and cyber security shadowing.

Education

A-levels: Mathematics, Further Mathematics, Physics, Economics 2026 - 2028
Currently studying in Year 12.
Monk's Walk School - GCSEs and Creative iMedia 2026
Grade 8: Mathematics, Physics, Computer Science.
Grade 7: Biology, Chemistry, English Literature.
Grade 6: Spanish, Art, English Language.
Creative iMedia: Level 2 Merit.

Relevant Experience

Tesco Headquarters - Cyber Security & Software Development Placement 2025

- Invited back for a dedicated week with Tesco's cyber security team following a software development placement.
- Shadowed security staff to learn how SOC teams investigate alerts and coordinate incident response.
- Observed code reviews, automated testing and deployment workflows, and attended software team stand-ups.

Tesco Headquarters - IT Operations Shadowing 2024

- Observed infrastructure automation and incident management, and practised basic PowerShell scripting.

Technical Projects

Glyph - Note Publishing Application github.com/pphilfre/glyph

- Built a Next.js application for editing and publishing Markdown and mathematical notes, with Clerk sign-in and Convex file storage.
- Added backend ownership checks for private notes and publishing controls that withdraw public access when a note is unpublished.
- Sanitised rendered content and included automated tests for unauthenticated requests, cross-user access, upload validation and publication revocation.

Markup - Markdown Workspace github.com/pphilfre/markup

- Developed a TypeScript and Next.js workspace with live Markdown preview, mathematical notation, diagrams and linked notes.
- Added PostgreSQL storage through Prisma and synchronisation logic for local edits and saved workspaces, with Tauri support for local files.

Home Infrastructure & Security Lab freddiephilpot.dev/about

- Maintain Linux services on Oracle Cloud and local Proxmox virtual machines using Docker Compose and Traefik.
- Configured Tailscale for remote access to home devices and Pi-hole for DNS filtering on a Raspberry Pi.
- Use Wazuh for lab log analysis and Grafana and Prometheus to monitor system performance.

Technical Learning & Achievements

Cisco courses completed: Endpoint Security and Network Defense (February 2026), Introduction to Cybersecurity (July 2024).
KS4 Computer Science Student of the Year - Monk's Walk School.
Duke of Edinburgh Bronze Award (2025): volunteered at a library, helping visitors and supporting reading programmes.

Technical Skills

Development: TypeScript, React, Next.js, Git, Python, basic PowerShell.
Systems & networking: Linux, Docker Compose, Proxmox, Oracle Cloud, DNS, VPN configuration.
