Profile

Motivated Year 12 student studying Mathematics, Further Mathematics and Physics, with a strong interest in cyber security, technology and IT infrastructure. Previous work experience at Tesco has provided exposure to security operations, software development and IT management. Alongside independent technology projects, I volunteer as a Maths Ambassador, supporting younger students and developing my communication and leadership skills. Eager to gain further professional experience, apply analytical thinking and broaden my understanding of technology in a business environment.

Education

Monk's Walk School - A-levels 2026–2028
Mathematics, Further Mathematics and Physics

GCSEs and Creative iMedia 2026
Grade 8: Mathematics, Physics, Computer Science. **Grade 7:** Biology, Chemistry, English Literature. **Grade 6:** Spanish, Art, English Language. **Creative iMedia:** Level 2 Merit.

Work Experience

Tesco - Cyber Security and Software Development July 2025
Two one-week placements at Tesco Headquarters.
- Worked alongside a staff member using Splunk search filters to investigate an unusual authentication request, subsequently confirmed as legitimate.
- Shadowed cyber security teams, gaining insight into security monitoring, threat investigation and incident response.
- Observed software development practices, including code reviews, automated testing and team meetings.
- Invited back for a dedicated cyber security placement following the original software development experience.

Tesco Headquarters - IT Operations Shadowing July 2024
- Observed infrastructure automation, IT operations and incident management; practised basic PowerShell.

Leadership and Volunteering

Maths Ambassador - Monk's Walk School 2026–Present
- Mentor Year 7–11 students, helping them understand challenging mathematical concepts, improve problem-solving techniques and develop confidence in their abilities.
- Deliver individual and small-group support, identifying areas of difficulty and adapting explanations to different learning needs and levels of understanding.
- Guide larger groups through mathematical questions, clearly explaining methods, encouraging participation and promoting independent thinking.

Library Volunteer - Welwyn Hatfield Borough Council Jul–Sep 2025
- Supported the Summer Reading Challenge by registering children, discussing books and encouraging participation.
- Communicated with children, parents and staff, recognising achievements and contributing to a welcoming library environment.

Independent Technology Projects

Home Infrastructure and Security Lab Portfolio
- Configure and maintain Linux services, virtual machines and cloud infrastructure, exploring networking, system administration and security.
- Use monitoring and security tools to investigate issues and understand system performance.

Glyph and Markup - Application Projects Portfolio
- Planned and designed applications for organising, editing and publishing notes, considering functionality, usability and information management.
- Reviewed application behaviour, tested features and identified improvements to functionality and user experience.

Skills and Achievements

Professional: Analytical problem-solving, mentoring, communication, teamwork, adaptability and organisation.
Technical: Linux, networking, Docker, cloud infrastructure, system monitoring, Splunk and application testing.
Certifications: Cisco Endpoint Security and Network Defense (2026); Introduction to Cybersecurity (2024).
Achievements: KS4 Computer Science Student of the Year (2026); Duke of Edinburgh Bronze Award (2025).
